

# About us

Picture of me in a hard hat

18 years experience working on drawings/design and build/project manager/working foreman.  
I am a former builder with many years of experience with different building fabrics,  
both traditional and contemporary. I approach matters from a practical perspective for my clients,  
working with them to achieve a design that will work best.  
All drawings are carried out digitally, we have the latest C.A.D software. And draft sketches can be carried out by hand.

Please note these are images of construction projects that i have designed, worked on and managed

Pictures of images i can send to you
